

What makes good soil for a church Website?

The Organic Blend

only from SiteOrganic

SiteOrganic Service (SOS)

- ☑ Responsive technical support to fix bugs quickly
- ☑ Ministry-savvy training and help to save you time
- ☑ Results-driven SiteOrganic Gurus to help you bear fruit

SiteOrganic Intelligent Design

Beauty meets brains in every SiteOrganic Website. Your site will automatically handle tasks like sizing images, removing old content, and allowing for flexible content layouts.

SiteOrganic Open

Cross pollenate your site with content and data from other sources! We support a broad range of mash-ups. Embed videos from YouTube and Vimeo. Enrich your Web pages with Twitter and blog posts. Show RSS feeds with custom formatting. Link to social networking platforms. Automate forms and user profiles with church database systems like Fellowship One. Enhance mobility with smartphone and text-messaging options.

SiteOrganic Advanced Administration

Control your web editors, edit your CSS style sheets, and manage site-wide behaviors like nav menus and shared footers. Get detailed stats on site traffic, or integrate SiteOrganic with your Google Analytics account.

SiteOrganic mCMS Suite

A ministry-rich blend of flexible page management, file uploads, form builders, media, communications, secure authoring controls, event management, commerce, and reporting built around the way you run your organization.

SiteOrganic Solid Rock Hosting

Latest hosting platform technology that fits a strategic ministry who relies on their Website. We provide redundant fast connections to the Internet backbone, hardened security for all your stuff, and multiple local and cloud-based backups throughout the day to help prevent loss, intrusion or interruption.
